Vegetable Seed Trials

FOREWORD

OR over five years we have had the pleasure and privilege of supplying seeds, plants and bulbs to some of the country's most discriminating, private and professional gardeners.

Each successive year has seen us make further attempts to improve both the quality of each product and the fashion in which it is handled.

We again report progress in handing you herewith a thoroughly revised catalog of the best things for the 1931 garden.

WE CARRY at our store a large stock of Jardinieres, Vases, Bird Baths and Houses, Sundials and Garden Furnishings and Tools, which are not listed in this catalog. We are always pleased to welcome out-of-town customers at our store and show them our stock.

BEING LOCATED outside the limits of the large cities, such as New York or Philadelphia, we are enabled to work with a comparatively smaller overhead expenditure, and whatever economies are effected in this way we endeavor to pass on to our customers.

OUR WISH for all our friends is that they may experience both pleasure and profit from their gardening activities during the year 1931.

CUSTOMER'S SERVICE DEPARTMENT

WE ARE always pleased to help our customers, especially amateurs, who may need advice in connection with their gardening problems. If you are in doubt as to the special treatment or soil conditions for any particular plant, or desire information on suitable varieties for various local conditions, or in regard to your lawns, shrubbery, etc., do not hesitate to communicate with our "Service Department," which is always freely at the disposal of our customers.

GARDENERS AND FARMERS

WE HAVE at all times the names of practical gardeners and farmers on our register who are in want of situations. If parties desiring such will write us, we shall be glad to put them in communication with men we deem suitable. We make no charge for this service.

ORDER EARLY—We urge our patrons to send in their orders as soon as possible after this catalog is received. This allows us ample time to give careful attention to the filling and dispatching of same before the "crowded hours" tax our energy and resources to the limit, when the sowing season actually commences.

TETHER & DON, Inc., gives no warranty, express or implied, as to description, quality productiveness or any other matter of any seeds, bulbs or plants they send out and they will not be in any way responsible for the crop. If the purchaser does not accept the seeds on these terms, they are at once to be returned.

Depth to Cover the Seed. Following is a good general rule—cover to a depth equal to $2\frac{1}{2}$ times the diameter of the seed. Exceptions—50 per cent deeper when sowing during hot weather, or on soils that dry out quickly; 50 per cent less deep when sowing on heavy land or during wet weather.

A Good Hint. Radish is a strong germinator, while Beet, Parsley, Carrot, Celery, Parsnip, Onion and some others are weak; it is recommended to mix a small quantity of Radish with these seeds when sowing, removing the Radishes afterwards. Radish seedlings break the soil crust and quickly mark your row. This process is particularly advantageous upon soils that bake.

LAWN GRASS SEEDS

For the formation of new lawns, 1 lb. will sow 200 square feet, or 10x20; 100 lbs. will sow one acre. For renovating old lawns, use one-half this quantity.

"EVERGREEN" LAWN GRASS

This is a mixture of the finest American and European grasses best adapted for lawns. It is prepared from our own formula, and is a careful blending of varieties suitable to producing the thick growth and velvety appearance so much sought after.

Lb. 70c., 5 lbs. \$3.50, 10 lbs. \$6.75, 25 lbs. \$16.75,
100 lbs. \$65.00

"CENTRAL PARK" LAWN GRASS

Weight per bushel, 20 lbs.

This is a popular lower priced mixture and is well suited for various soil conditions. Forms a thick turf in a very short time.

Lb. 50c., 5 lbs. \$2.50, 10 lbs. \$4.75, 25 lbs. \$11.75,
100 lbs. \$45.00

"SHADY PLACE" LAWN GRASS

Weight per bushel, 20 lbs.

This mixture is composed of grasses that are naturally adapted for growing under trees and shaded situations.

Lb. 70c., 5 lbs. \$3.50, 10 lbs. \$6.75, 25 lbs. \$16.75,
100 lbs. \$65.00

For FIELD and GOLF COURSE GRASSES, see page 22 and 23

"LAWN RESTORING" GRASS MIXTURE

Weight per bushel, 20 lbs.

A mixture of grasses suited to take firm hold and quickly in unfavorable situations.

Lb. 60c., 5 lbs. \$3.00, 10 lbs. \$5.75, 25 lbs. \$14.25,
100 lbs. \$55.00

"LAWN TENNIS" GRASS MIXTURE

Weight per bushel, 20 lbs.

Will make a fine green and lasting turf.

5 lbs. \$3.00, 10 lbs. \$5.75, 25 lbs. \$14.25, 100 lbs. \$55.00

"TERRACE" GRASS MIXTURE

Weight per bushel, 20 lbs.

A mixture of grasses with long, interlacing roots, that will bind steep embankments.

5 lbs. \$2.75, 10 lbs. \$5.50, 25 lbs. \$13.00, 100 lbs. \$50.00

"SEASHORE" GRASS MIXTURE

Weight per bushel, 20 lbs.

Composed of grasses suitable for seaside lawns.

5 lbs. \$2.75, 10 lbs. \$5.50, 25 lbs. \$13.00, 100 lbs. \$50.00

Novelties and Specialties in Vegetables

White Boston Lettuce

BEET, Winter Keeper

This Beet is also known as Long Season and Coal Black.

It is a late Beet, not of handsome shape, but of exceptionally fine quality, remaining sweet and tender even when very large.

The Beets will keep all Winter and retain their fine quality until Spring. They are half long, very dark red and have green foliage.

Pkt. 15c., oz. 40c., $\frac{1}{4}$ lb. \$1.25, lb. \$4.00

BROCCOLI, Italian Green Calabrese

There is a growing demand for this vegetable, which is very similar to Cauliflower, both in culture and cooking.

Pkt. 25c., $\frac{1}{4}$ oz. 75c., 1 oz. \$2.50

BRUSSELS SPROUTS, "Breachin Castle"

A superior strain of fine quality and a wonderful exhibition variety.

Pkt. 10c., $\frac{1}{2}$ oz. 30c., oz. 60c., $\frac{1}{4}$ lb. \$2.00

CAULIFLOWER, "First and Best"

This is the earliest of all Cauliflowers and is particularly adapted for forcing under glass, and for very early Spring crop outdoors. It is very white, smooth and even in character.

Pkt. 50c., $\frac{1}{4}$ oz. \$2.50, oz. \$8.00

CORN, "Golden Early Market"

This is the earliest yellow sweet corn on the market today. Matures about one week earlier than Golden Sunshine. Stalks $4\frac{1}{2}$ ft. high with ears 6 inches long, rather blocky. A good variety for market men as well as private gardeners.

Lb. 40c., 2 lbs. 75c., 10 lbs. \$3.50

CUCUMBER, "Longfellow"

An excellent long, slender, dark green variety equally desirable for greenhouse forcing or out door culture. An ideal type for the private garden or as a "straight pack" variety for shipment to market. 12 to 14 inches long by $2\frac{1}{2}$ inches in diameter.

Pkt. 15c., 1 oz. 50c., $\frac{1}{4}$ lb. \$1.75

LETTUCE, "White Boston"

The best strain of the butter head type, 10 days earlier than Big Boston. Very large frame and head, Will not tipburn, nor turn red, and will hold several days in the field after maturity before bolting to seed.

Pkt. 15c., oz. \$1.00, $\frac{1}{4}$ lb. \$3.00

MUSK MELON, "Sugar Rock"

This is one of the most prolific varieties grown. Five to seven perfect fruits are produced on one vine. The fruits are oval and medium in size, and are not ribbed. Color light golden yellow with heavy grey netting and deep orange flesh. Matures in about 80 days.

Pkt. 15c., Oz. 50c

ONION, "Ailsa Craig"

This variety is used very extensively for exhibition purposes as well as culinary. Will grow very large, often weighing 2 lbs. apiece.

Our strain is extra selected. Pale straw-colored.

Pkt. 25c., oz. \$1.00, $\frac{1}{4}$ lb. \$3.50

PEPPER, "California Wonder"

This new and distinct Pepper possesses many points of excellence. It has the fine quality of the Pimiento and the size of Giant Crimson with a thickness of flesh unknown in any variety of pepper. It is not uncommon to find fruits showing flesh three-eighths of an inch thick. In addition to this it is of the finest quality, being sweet, crisp, tender and entirely free from pungency.

Pkt. 25c., $\frac{1}{2}$ oz. 75c., 1 oz. \$1.25

PEPPER, "Prolific Market"

This is a new variety introduced by us this year. It is an enormous cropper, fruits as large as Chinese giant, with extremely thick flesh. A valuable addition to the pepper family.

Pkt. 25c., Oz. 75c., $\frac{1}{4}$ lb. \$1.25

SQUASH, "Straight Neck"

A valued selection from the giant summer crook-neck squash with none of its defects. Fruits, which measure 18 to 20 inches in length, are of a deep orange color, intensely warted, and have a deeper flesh which is thicker and more meaty than the old type.

Pkt. 15c., Oz. 40c

TOMATO, "Break O'Day"

This is a new outstanding variety of globe shape. As early as Earliana and has all the good traits or qualities of Marglobe. Deep red flesh.

Pkt. 30c., 4 Pkts. \$1.00

TOMATO, Marglobe

A main crop scarlet fruited variety of globe type. It fruits early and continues to yield up until frost. It resists wilt and is immune to rust.

Per pkt. 15c., $\frac{1}{2}$ oz. 60c., 1 oz. \$1.00, $\frac{1}{4}$ lb. \$3.50

Lettuce, Big Boston

LETTUCE

One ounce will sow 150 feet of drill

With the proper selection of varieties, a continuous supply of Lettuce can be had throughout the season by sowing seed outside at intervals of two weeks, from April 15 to August 15. Use the head Lettuce for early and late sowing, and the leaf Lettuce during the summer months. To produce solid heads, plants in very rich soil. For first-early crop, sow in hotbed in March, and transplant outside the middle of April. Sow outdoors as soon as the ground opens, in drills from 1 to 2 feet apart, covering the seed with ¼ inch of soil. Thin out to 10 inches apart. Lettuce should not be transplanted after May 15, or you will not get heads. Drop two or three seeds every 10 inches and leave the strongest plant to grow.

GRASS SEED FOR HAY AND PERMANENT PASTURE

These mixtures include the most nutritive and productive species of grasses suitable for laying down light, medium and heavy soils to permanent grass.

The quantity of each variety is carefully regulated, with the object of forming pastures that will yield, in the shortest time after being laid down, the heaviest crop of grass during the whole of each growing season, and in all kinds of weather. Early and late species are included in suitable proportions so that the productive period may be extended as much as possible.

We recommend sowing ten pounds of mixed clovers to the acre in addition to the under-noted mixtures in the spring.

Special Mixtures for Light, Medium and Heavy Soils. 25 lb. \$12.00; 100 lb. \$45.00

AWNLESS BROME GRASS (<i>Bromus inermis</i>). A forage plant of the utmost importance, particularly in dry and southern sections; yields enormously	14	\$0.45	\$35.00
BERMUDA GRASS (<i>Cynodon Dactylon</i>). Of great value for lawns in the South	35	.60	55.00
CANADA BLUE GRASS (<i>Poa compressa</i>). A hardy perennial grass with creeping root-stalks forming a close turf; thrives on hard clay and poor soils	14	.60	55.00
CREEPING BENT GRASS (<i>Agrostis stolonifera</i>). Of rapid growth and spreading habit; a wonderful grass for both putting-greens and lawns; will stand severe rolling and constant cutting	20	1.75	150.00
CRESTED DOG'S-TAIL (<i>Cynosurus cristatus</i>). Good for dry hard soils	30	.75	70.00
ENGLISH RYE GRASS (<i>Lolium perenne</i>). An invaluable grass for both lawns and permanent pastures; grows freely on any soil, and is very nutritious. A good showing can be made within a month from time of sowing	24	.22	20.00
FINE LEAVED SHEEPS FESCUE . (<i>Festuca ovina tenuifolia</i>). Used on putting-greens, tees, and flagstone walks. Also good in shaded situations	14	.85	80.00
HARD FESCUE (<i>Festuca duriuscula</i>). A valuable pasture variety when mixed with others	14	.50	45.00
HUNGARIAN GRASS (<i>Panicum Germanicum</i>). This is a species of millet, growing less rank, with smaller stalks, often yielding two to three tons of hay per acre. Relished by all kinds of stock. Sow one bushel to the acre. (Price variable)	48	.15	10.00
ITALIAN RYE GRASS (<i>Lolium Italicum</i>). A variety unequaled for producing an abundance of nutritious feed in the early Spring as well as throughout the season; of very quick growth; not a perennial, but used in small quantities to assist the other grasses during the first year	20	.30	25.00
KENTUCKY BLUE GRASS (<i>Poa pratensis</i>). One of the most valuable of our grasses, thriving well on almost any soil; its densely creeping root-stalks, spreading habit and fine texture render it one of the best sorts for lawns. A true perennial, very productive and nutritious	14	.65	70.00
MEADOW FESCUE (<i>Festuca pratensis</i>). A valuable grass for permanent pasture; it succeeds best in cold, moist, light soils; very nourishing and much relished by cattle	22	.35	30.00
MEADOW FOXTAIL (<i>Alopecurus pratensis</i>). Should be included in all permanent pasture mixtures; very early and stands the heat well	10	1.00	90.00
ORCHARD GRASS (<i>Dactylis glomerata</i>). One of the grasses most employed in permanent meadows; it can stand considerable shade, and is recommended for woodlands and under the trees on the lawn; it is hardy, productive and makes excellent hay	14	.40	35.00
RED-TOP, UNHULLED (<i>Agrostis vulgaris</i>). A hardy, native perennial grass that accommodates itself to a variety of soils and stands our hot Summers admirably, remaining green for the greater part of the year	14	.35	30.00
RED-TOP, FANCY RECLEANED . Same as above only that it is absolutely clean and free from chaff	32	.55	50.00
RED, or CREEPING FESCUE (<i>Festuca rubra</i>). (New Zealand Grown). A creeping-rooted grass, forming a close and lasting turf, and especially adapted for dry, sandy soils; it is valuable for shady places in the lawns as well as for golf-courses	14	.65	60.00
RHODE ISLAND BENT (<i>Agrostis canina</i>). Resembles Red-Top, but is of dwarfer habit, with shorter and narrower leaves. It makes a beautiful, close, fine turf and adapts itself to all soils. It is one of the best grasses for lawns and putting-greens	14	1.75	150.00
ROUGH-STALKED MEADOW GRASS . (<i>Poa trivialis</i>). An excellent grass for shady situations also suited for putting-greens and fairways. Makes good turf	20	.90	85.00
SEASIDE BENT . (<i>Agrostis Maritima</i>)		2.50	
SUDAN GRASS (<i>Sorghum</i>). A quick growing hay and pasture crop. Sow 25 lbs. per acre	25	.20	15.00
TALL OAT GRASS (<i>Avena elatior</i>). Valuable for pasture on account of its early and luxuriant growth. It is very hardy and withstands extreme drought	14	.45	40.00
TIMOTHY (<i>Phleum pratense</i>). A most valuable grass for hay. It is often sown with Red-Top and Red Clover, and the nutritive value of the hay is greatly increased by this mixture. If sown alone, one-half bushel to the acre should be used	45	.20	15.00
VELVET BENT . (<i>Agrostis Canina</i>).		5.00	
WOOD MEADOW GRASS (<i>Poa nemoralis</i>). Well adapted for growing under trees and shaded situations; permanent and hardy, resisting extremes of heat and cold	14	.90	85.00

ASTER

Improved California Sunshine or Anemone Flowered

An interesting and attractive type of Aster. The plants are sturdy and strong, throwing up long flower stalks, making wonderful cut flowers. Some of the flowers have quilled petals; all have a cushion center of tiny quills of a contrasting color which makes a flower look as if it were covered with snowflakes. The blue flowers are dotted with a paler blue and some in white, and the rose in a lighter shade of pink or white. The California type of Sunshine Aster which we offer is a great improvement on the original, the flowers being larger and borne on longer stems. The entire effect is very graceful and pleasing and no gardener should fail to grow this beautiful variety.

GIANT ASTERS H.H.A.

Asters without a doubt are one of the most popular flowers grown because of their easy culture. It matters little whether the soil is rich or poor. You can enjoy an abundance of beautiful flowers from early July until late in September with the help of the different kinds offered below.

IMPROVED CALIFORNIA SUNSHINE Anemone Flowered

An interesting and attractive type of Aster. The plants are sturdy and strong, throwing up long flower stalks, making wonderful cut flowers. Some of the flowers have quilled petals; all have a cushion center of tiny quills of a contrasting color which makes a flower look as if it were covered with snowflakes. The blue flowers are dotted with a paler blue and some in white, and the rose in a lighter shade of pink or white. GIANT MASTERPIECE

The Masterpiece Aster is a new midseason to late flowering strain and is characterized by the exceptionally large blooms, long, vigorous stems and sturdy habit of growth. The plants grow 3 to 3½ feet high with long stems, 18 to 30 inches in length, bearing beautifully formed and interlaced flowers 5 to 6 inches in diameter. By careful selection the strain has been still further improved since we offered it last season, the purity and clarity of the colors being unapproached by any other type of Aster. The blooms are excellent for cutting and stand up well when shipped.

T. and D.'s SELECTED SWEET PEAS

CULTURE OF SWEET PEAS

In order to have any success at all with Sweet Peas they should be planted very early, as soon as the ground can be worked in the spring.

Whenever possible select a position in the garden where they will get morning and forenoon sun only and no afternoon sun; in this way the flowering season will be long and the stems more satisfactory.

Dig a trench about a foot wide and deep and fill in about 4 inches with well rotted barnyard manure. Then replace 4 inches good garden soil. Then open 2 drills or rows about 8 to 10 inches apart and plant seed 1 inch deep.

Whenever the plants are well up they should be thinned out to six inches apart and another two inches of soil applied.

The brush or wire support is placed in the center of the two rows to act as a support to which the vines from both sides can cling.

Watering: Whenever the soil begins to get a little dry give a thorough soaking; about once a week at first and later on twice a week, which is much better than a little sprinkle every day.

Feeding: In most soils Sweet Peas will benefit from Liquid Manure applied after the plants have flowered for some time.

Do not allow dead flowers to remain on the vine. The more flowers you pick the more you will have.

T. & D.'s CHOICE ZINNIAS

YOUTH AND OLD AGE

The Zinnia is one of the most brilliant, showy and satisfactory of annuals, has long been a general favorite, and is now enjoying a wide popularity, not only for garden decoration, but also for cutting. The seed can be sown early in the hotbed or light window and transplanted, or sown later in the open ground. They come into flower early in the Summer and keep on blooming until frost.

Zinnia Giant Dahlia Flowered

DOUBLE LILLIPUT OR POMPON ZINNIAS

A very pretty type of compact habit, not over 15 inches high, bearing in lavish profusion, small, densely double flowers on long stems, held well above the foliage. Makes a good line or bed and are of more than usual value for cutting.

NEW AND RECENT INTRODUCTIONS

Tubers Plants

American Triumph (Numeviller) Cac.		
Large incurved cactus flowers of bright clear rich red. Perfect stems	\$ 7.50	\$3.75
Andrea Ericson (F & M) Dec. This is a splendid new fluffy white. Flowers are large and produced on excellent stems. In appearance it looks like a pure white Fort Monmouth	10.00	5.00
Andreas Hofer (Drew) HC. Color is a glowing light pink, with a salmon rose suffusion	1.75	1.00
Antartica (MacDonald) Dec. A pure white of large size, very free flowering with long sturdy stems holding the flowers erect at all times	7.50	3.75
Arthur W. Hyde (Mastick) Dec. A large flower with broad petals loosely arranged, of orchid pink with a reverse of burgundy. Stems are strong and support the large bloom erect		5.00
Asbury Park (Wood) Dec. A very large and vigorous grower, with very tough foliage. The large, self colored light pink blooms are borne on strong, stiff stems at a pleasing angle		7.50
Betty Ivins, Dec. Color rich salmon, overlaid with an amber glow showing a rosy pink reverse	3.00	1.50
Captain Coste (Curran) Dec. This Dahlia is one of the best new introductions of this year; a real exhibition flower, which easily exceeds 12 inches, borne on very Stout stems. It is a clear empire yellow and looks yellow under artificial light. The plant is a strong and vigorous grower, with robust foliage		7.50
Cardinalis (Kennedy) Dec. Brilliant Cardinal Red. Splendid formation, flowers borne on strong upright stems	10.00	5.00
Charlotte La Frenz, D. Bright gold in center, shading to a rich apricot in the outer petals	3.00	1.50
Chemaris Eureka (Chemar) Dec. Almost pure white, the tips of the center petals being lavender	5.00	2.50
Clansman (Mills) Dec. A beautiful apricot, orange center, darkening to jasper pink. radiating a golden sheen	2.50	1.25
Coringa (Broomall) Dec. Yellow, shaded cornelian red. A rich, coppery-orange color. Habit of plant is quite dwarf. As a bedding Dahlia, it is a class by itself	3.00	1.50
Derrill W. Hart (Broomall) Dec. Yellow, shading to grenadine-red; in cool weather almost copper color	5.00	2.50

Jane Cowl

Tubers Plants

D. J. Sandt (V. & M.) Dec. Reddish orange striped and splashed blood red with a suggestion of rose violet on the reverse petals. The petals curve outward twisting at the points	7.50	3.75
Dorothy Stone (F. & M.) Dec. Beautiful rose pink flowers on fine stems	7.50	3.75
Dr. John Carman (Dixon) Dec. An exceptionally strong and vigorous grower. Almost a true American Beauty Rose. Stems are excellent and the foliage strong and tough	5.00	2.50
Eagle Rock Gem, Cac. Maize-yellow, shaded orient-pink, this is certainly the finest shaped, strong-stemmed Cactus Dahlia yet produced	7.50	3.75
Eagle Rock Wonder (Bromall) Cac. A large and splendid blooming semi-cactus of orange shading to orange-buff. Splendid stems		10.00
Edith Parke Yoke (V. & M.) Dec. Exquisite rich fuschia shade. The petals are curled and form a flower of great depth.	7.50	3.75
Edward Thomas Bedford (Brock) Dec. This is a very large deep purple, produced on ideal stems. A strong vigorous grower and makes a large spreading plant	15.00	7.50
Eliza L. Shephard (Peacock) Dec. A beautiful flower of bright golden and orange apricot evenly blended. The flowers are large and produced on splendid stems	10.00	5.00

	Tubers	Plants
Esplendor (Mastick) Semi Cac. A seedling from Ambassador which it resembles in color only being much deeper in tone throughout. It is a good grower and has stiff upright stems	2.00	
F. J. March (Bessie Boston) Semi Cac. This is one of the best from California this past season. It is a beautiful silvery lavender. A very free bloomer and the stems are very good	10.00	
Fort Monmouth (Kemp) HC. One of the giants of the Dahlia world. The color is a rich crimson-maroon, with a brightness unusual in the darker tones, and just a faint tinge of bluish-violet at tips of petals	5.00	2.50
F. W. Butler (Bessie Boston) Dec. A very large flower commanding immediate attention, produced on splendid stems. Early, the color is gold heavily overlaid with a dull brownish red. Later they are golden orange	10.00	
F. W. Fellows (Stredwick) Cac. A lovely orange scarlet of the incurved cactus type which is still a great favorite75	.50
Gertrude Ederle, HC. Is of a lovely primrose color and has unusual keeping qualities	5.00	2.50
Gold Imperial (Hall) Dec. A rich gold color with a tint of lavender on the reverse. The flowers are large and deep with high centers. A strong vigorous grower with good stems	7.50	3.75
Goodnight (Broomall) Dec. Of medium height, but the dark crimson flowers are massive	7.50	3.75
Governor Larson (Hall) Dec. This Dahlia has been greatly admired this past season. It is a clear golden yellow with a slight apricot blush on the reverse. On opening it resembles in color the Claudius Pernet Rose	7.50	3.75
Grover Whalen (F. & M.) Dec. A pure orange Dahlia with ideal stems. Splendid cut flower	4.00	2.00
Harry Strutt (Stredwick) C. Rich deep crimson scarlet. Good stems	2.00	1.00
Jane Cowl (Down) Dec. A large flower of buff and old gold, blending to a bright salmon at the center	3.00	1.50
Jean Trimbee (Trimbee) HC. Beautiful Petunia-violet, strong vigorous habit, free bloomer	10.00	5.00
Jersey's Buttercup (Waite) Dec. This Dahlia is a picric yellow throughout late September, but earlier in the season, the outer florets are tinged with amber. The bush is of spreading habit, covered with many blooms on slender stiff stems which make it ideal for vase work	10.00	5.00
Jersey's Glory (Waite) Dec. The color is best described as a yellow hue of orange. The stems are long and stiff	5.00	2.50
Jersey's Harmony (Waite) Dec. The color is blush shading to white in the center and the florets when opening are streaked with amaranth pink. Bushes are of medium height with clean glossy foliage; flower stems are very stiff	5.00	2.50

Jersey's Triumph

	Tubers	Plants
Jersey's Meteor (Waite) Dec. A strong vigorous grower of the Jersey's Beacon type of which it is a seedling. Strong robust foliage and a splendid exhibition flower of practically a new shade of light salmon orange. The stem is good and holds the bloom erect	10.00	5.00
Jersey's Triumph (Waite) Dec. Bright copper flushed with salmon bronze. Habit is the same as Jersey's Beauty	7.50	3.75
Katherine Cole (McDowell) Dec. A year ago this beautiful Dahlia won the Darnell Cup for the best keeping variety. It is a beautiful combination of light pink and cream. Very good stem, and the foliage is thick and leathery	10.00	5.00
Kathleen Norris (F. & M.) Dec. A bloom of gigantic proportions. Color a true rose-pink, later deepening to mallow-pink, but paler in the young central petals. Foliage dark green and leathery	10.00	5.00
Kemps Violet Wonder (Kemp) Dec. The best violet-colored Dahlia to date. The predominating color is a rich naphthaline-violet with an underlying tone of royal purple. Reverse is bluish-violet	5.00	2.50
King Midas (Peacock) Dec. Rich golden yellow flowers of large size produced very freely on good stems	7.50	3.75
Mardi Gras. (Diggle) Dec. Deep Burgandy in color. Large flowers produced on long stiff stems	5.00	2.50
Margaret W. Wylie (Fraser) Dec. A large loose petalled flower of a beautiful shade of rose-red, the reverse of the petals being a rose-pink shaded silver. Stems are ideal and it is a profuse bloomer	10.00	5.00

DAHLIAS, NEW AND RECENT INTRODUCTIONS—Continued

	Tubers	Plants
Minnie Eastman (Eastman) Semi Cac. A flame with an undershading of yellow. A splendid variety	5.00	2.50
Miss Longview (Mastick) Dec. Described by the introducer as a hybrid cactus, but really belongs in the informal decorative class. It is a bright canary yellow with a jasper red reverse, giving the flower a soft salmon tone. They are large and produced on splendid stems	-----	5.00
Mommouth Champion (Kemp) Dec. This is a strong vigorous grower producing extra large blooms of a brilliant orange flame. The stems are perfect and it makes a splendid exhibition flower	10.00	5.00
My Maryland (Down) HC. This graceful, broad-petaled Hybrid Cactus is a rich, bright pink, each petal tipped with ivory.	5.00	2.50
Netawaka, HD. Orange-yellow base, shading to jasper-red, reverse of petals bright carmine. The petals are twisted so that the reverse color is very much in evidence	5.00	2.50
North's Yellow (Peacock & Dahliadel) Dec. A fine light yellow of large size produced on long stiff stems	3.00	1.50
Penn Charter (Hall) Dec. This is a well-formed flower of exhibition size with good stems. The color is a golden yellow tinted apricot	7.50	3.75
Phyllis Ash (Mastick) Dec. A soft shade of rose pink, blended with pale yellow. A free bloomer on ideal stems	-----	5.00
Regal (Boston) Dec. A delightful and different combination of Autumn shades; bronze, heavily suffused with dull petals giving an effect of burnished copper	10.00	5.00
Sanhican's Beauty (F. & M.) Soft pinkish orange. Flowers medium size with excellent stems	3.00	1.50
Sanhican's Peach (F. & M.) Dec. In color, it is exactly the shade of a ripe California Peach, with a real Peach cheek glow. Its attractiveness is further enhanced by the oddly twisted petals with stag-horn tips	3.00	1.50
Sanhican's Rosalie (F. & M.) Dec. A true deep rose with excellent stems and large flowers	2.00	1.00
Shawnee's Peach (V. & M.) Dec. Flowers are gigantic, easily attaining 10 inches, Color like a ripe Georgia Peach	10.00	5.00

HARDY GARDEN LILIES

The Lilies listed below are for spring planting and should be planted by June 1st. Bulbs should be planted six inches deep except where noted. Lilies do best in the hardy border or among shrubbery, because the flowering stems bear masses of roots immediately below the ground surface, and the shady situation helps protect these feeding roots from the hot sun. Lilies thrive in any well-drained garden soil where the ground does not become water-logged, but do not want to come in contact with fresh manure.

Lilium auratum

Auratum (The Golden-banded Lily of Japan). Each Doz. 100
Delicate ivory white color, thickly studded with chocolate, crimson spots and striped through the center with a golden yellow band. Should be planted 8 to 10 in. deep, in sunny or partly shaded situation. August.

Extra Size Bulbs, 11 to 13\$0.60 \$6.00 \$50.00

Mammoth Size Bulbs, 9 to 1150 5.00 40.00

Auratum Platyphyllum. By far the most vigorous of the Auratum family. Has broad petals with gold band in center. The spots vary in color from brown to yellow.

Mammoth Size Bulbs, 9 to 1175 7.50 60.00

Batemanniae. A beautiful apricot-shaded lily of easy cultivation which does equally well in partial shade or full sun. Stem rooting; plant 6 inches deep. Height 3 ft.

Extra Size Bulbs40 4.00 30.00

Canadense. A very beautiful native Lily. Flowers range in color from yellow through orange to red, all showing more or less purplish-brown spots. Grows 4 to 5 feet high, flowering June-July. Prefers peaty soil. Stem rooting; plant 8 to 10 inches deep.

Extra Size Bulbs20 2.00 16.00

Croceum. (The Orange Lily) Each Doz. 100
A robust, strong stem lily bearing huge umbels of beautiful orange colored, upright blooms. Stem rooting; plant 5 inches deep. Height 3 feet; blooms June-July.

Extra Size Bulbs50 5.00 38.00

Davuricum. This lily thrives in any fair garden soil and prefers the full sun. The flowers are borne erect in umbels of three to five and are of orange shade, flushed red and spotted black. As the bulbs are small, they should be planted close together about 5 inches deep. Height 2 to 3 feet; bloom June-July.

Extra Size Bulbs50 5.00 38.00

Elegans Mixed. This is a dwarf group of lilies, flowering during June and July. They include various shades of yellow, buff, orange and red. 12 to 24 inches in height; doing best in light soil; plant 6 inches deep.

Choice Bulbs30 3.00 22.00

Hansoni. This lily will thrive in almost any soil or situation, but is best grown in partial shade as it fades in full sun. Numerous blooms of deep, rich, orange-yellow shade, spotted brown. Stout stems, 4 to 5 feet high; blooms in June.

HARDY CHRYSANTHEMUMS

These plants are indispensable in the garden or hardy border as they produce a profusion of blooms giving color and beauty to the garden at a time when other plants have been destroyed by frost. They are reasonably hardy if planted in a well-drained position and if given a slight protection of leaves or loose litter during the winter.

Chrysanthemums are divided in four groups as listed below. The varieties described below have been selected from an immense list and we believe them to be the best in their respective class and color.

All plants — 25c each;

\$2.50 per dozen;

\$20.00 per 100.

ROSES

Everybody who has a garden must have Roses. No home is complete without a few of the dwarf varieties grouped in the garden or in beds in the lawn. A Rambler or so on the fence or on a trellis adds greatly to the beauty and arrangement of the yard and garden.

Culture and Hints on Growing. Roses like a well drained location where they will get the full sun for at least part of the day. The soil should be prepared at least 18 inches deep with which about one-third of its bulk is replaced by well rotted cow manure. As roses are great feeders, a trowel full of Bone Meal worked around the plant two or three times a season will insure better results.

In planting make the holes rather broader than deep, so that the roots may be spread out naturally in a horizontal position. Set the plant so that the junction of the root and top will be just under the ground surface when leveled off. Work fine soil among the roots, tamping it firmly with fingers and fist, and when roots are all covered tamp it solid. Water the plant well with a full pail of water.

We are in an exceptionally good position to supply extra fine Rose bushes, as they are grown within a short distance from our store, under our personal supervision. All plants are strong, sturdy, 3-year-old bushes and are guaranteed true to name.

LAWN SPRINKLERS

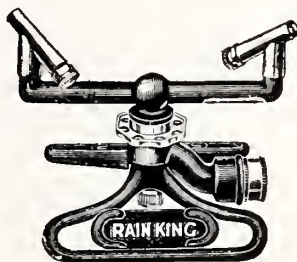

DOUBLE ROTARY SPRINKLER

This Sprinkler will cover an area up to 80 feet in diameter, giving an equal distribution over the entire area; it is easily regulated to cover small areas. It works best on a pressure of 30 pounds and over. The gears are of hardened steel and bronze, enclosed and run in oil. \$12.50 each.

RAIN KING

The best features of all sprinklers are combined in this sprinkler. Can be adjusted for circular or stationary spray, fine or coarse, fast or slow. It is small, compact and easily handled. All adjustments are simple. Each \$3.50.

GIANT RAIN KING

This model has four 20 inch arms, and stands 4 feet high. Adjustment the same as the smaller model listed above. Each \$14.00.

CIRCULAR TREE SPRINKLER

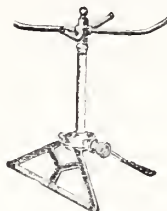

A new sprinkler, specially designed to water trees at one operation. It saves time, labor, and money. It will water your trees more efficiently than by any other known method.

BRASS FOUNTAIN RING

Very simple, cannot rust, or get out of order. Each \$1.00.

"C. B. G." SPRINKLER

The C. B. G. Sprinkler is built on the principle of the tangential spray. It is simple in construction and cannot get out of order. Each 40c.

PORTABLE SPRAY HEAD

For connecting with hose in series to create a movable and flexible lawn sprinkling system. Produces a beautifully perfect mist-like spray, evenly covering wide area, yet conserving water volume to a degree that permits a greater number of heads to be used on

normal pressures without reducing volume on those farthest from water supply. Each 60c.

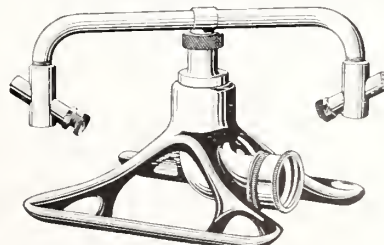

WATER WITCH

This sprinkler works best with a low water pressure. No. 4, with stand \$15.00

WATERFAN, Model No. 8

An oscillating sprinkler, 20 inches long, with fifteen diverging outlet tubes, mounted on a galvanized frame. With a water pressure of 35 lbs. will cover an area of 24 x 50 feet. Each \$18.00.

TETHER & DON'S "SPECIAL" LAWN MOWER

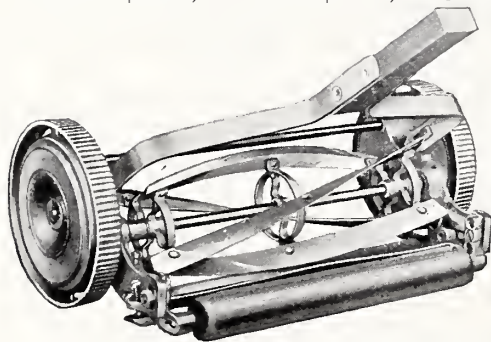

After careful and intensive study of lawn mowers, we are pleased to offer the line of "Special Mowers" which we think gives the best and most serviceable machine yet introduced to our many customers.

The special feature of these machines, besides the first-class workmanship and quality of material, is the method of drawcut which is the scientific principle of grass cutting. Briefly, the principle is this. The revolving wiper blades draw the grass across the stationary cutting knife, bending the grass backward at an acute angle. The knife, not the blades, does the actual cutting, the action being identically similar to that in using a pair of shears.

These are light easy running machines, 10 inch wheels; four blade, crucible steel drawcut wiper blades, hardened and tempered. Self-adjusting ball bearings and dust proof oil cups at all moving parts. The under knife is of crucible steel with lipped edge, and is automatically self-sharpening, screwed to the strong, rigid truss knife bar.

We can furnish the Special Mower in four sizes.

14 inch \$12.50; 16 inch \$13.50; 18 inch \$14.50; 20 inch \$15.50.

THE IDEAL POWER LAWN MOWER

A light, easily handled power mower. 30 inch cut. Speed, 2¾ miles per hour. Roller 14 inches in diameter and 11 inch diameter wheels; 5 spiral cutting blades. F. O. B. New York.

Pennsylvania Lawn Cleaner

This machine will remove from the lawn not only the cut grass, but all sorts of littler, leaves and trash, leaving the grass standing upright and free from foreign matter that prevents the sunlight and dew from getting to the roots.

The suction created by the three rapidly revolving brushes (or rakes) cleans the lawn on the same principle as the vacuum cleaner operates on carpet. It is easy to operate, and with it one man will do more and better work than four men with hand rakes.

The BRUSHES are recommended for removing worm-casts from putting greens, tennis courts, bowling greens and other close-cut lawns, where a smooth surface is essential. It can be used as a lawn or sidewalk cleaner, for removing leaves and other litter.

Provision is made for adjustment to take up the wear of the brushes, thus insuring the same efficiency of the sweeper until the brushes are entirely worn out.

The change from rakes to brushes, or vice versa, is easily made without taking the machine apart.

TADCO-SPECIAL GARDEN WAGON

The best cart made for use about the lawn, garden, etc. It is built low down and can be easily loaded and unloaded with big trees, shrubbery, balled evergreens, barrels, bay trees in tubs, etc. Will carry a weight of two tons and still run easy. Sixteen inches high over all, platform, 3 feet by 5 feet, made of heavy oak. Has a heavy pole with suitable hitch for horse or tractor when wanted for heavy work. Wheels are 10 inches high, with 4-inch smooth tire, 1½-inch solid steel axels, front wheels turn under platform. Painted green.

Price \$100.00

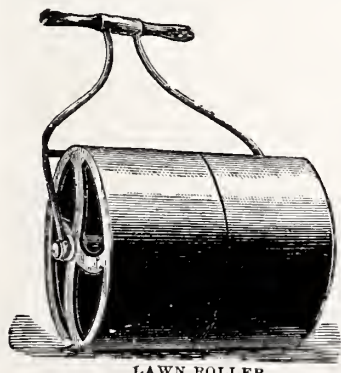

WATER BALLAST LAWN ROLLERS

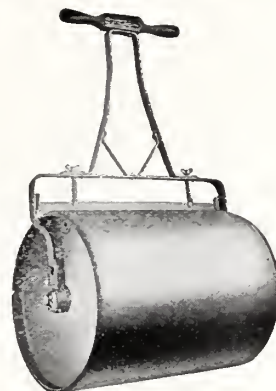

Drum is made of annealed steel with rounded edge, which prevents the cutting of the sod. Fitted with an adjustable scraper to keep the surface of the drum clean.

By filling the roller with water or sand any desired weight can be obtained to suit the lawn conditions. Sand increases the weight 50 per cent more than water.

PEAT MOSS MANURE POTS

COMPOSED OF CATTLE MANURE, PEAT MOSS AND OTHER PLANT FOOD.
BAKED TOGETHER AND MOLDED INTO POTS.

The plants not only grow in the pots, but feed on them, the roots growing into and through the sides and bottom. The pots will retain nine times their weight of moisture, thus eliminating sudden drying out of young seedlings. They are also porous.

These pots come in three sizes:

- 1 1/4 in. equal to a 2 1/4 in. clay pot.
- 1 1/2 in. equal to a 3 in. clay pot.
- 2 1/4 in. equal to a 4 in. clay pot.

Supplied in case lots only as listed below:

GATOR HIDE MULCH PAPER

Increases Garden Crop Yields

Eliminates the Work of Weeding

A new but proved method for the growing of garden crops, which eliminates practically all of the labor of weeding and cultivating. It is simple and easy to lay; just unroll the strips of paper between the rows, or lay it before planting, then cut holes through the paper where the plants are to be set. Besides checking the growth of weeds, this paper holds the moisture and warms the soil thus stimulating the crops, causing earlier maturity and increased yields.

The paper comes in two types each in 18 inch and 36 inch rolls.

Type A.—for Annuals in field culture.

18 inch roll — 300 linear yards to the roll	\$3.50
36 inch roll — 300 linear yards to the roll	7.00

Type B.—for the Perennial in field culture and all garden work.

18 inch roll — 150 linear yards to the roll	\$3.50
36 inch roll — 150 linear yards to the roll	7.00
